

Supports Normal
Muscle Function &
Stamina in Horses

DESCRIPTION

Moving Up is designed to support stamina and the capacity of muscles to sustain exercise. Moving Up also supports normal immune function to help your horse deal with normal stress and strain of training & competition.

1. Biochemists report that Vitamin C and bioflavonoids work together synergistically to support the membranes of capillaries and cells.
2. Supporting energy production at a cellular level.
3. Supporting circulation.
4. Supporting vascular health.
5. Supporting normal blood pressure.
6. Antioxidants help maintain normal DNA and enhance the immune response.
7. Immune enhancing effects.
